Chapter 5: Appendix 4. Student Evaluation Questionnaire – evaluation instrument used with second year engineering students

Background
1. Which mathematics units have you completed?

While looking at the Vectors site
1. What should you be able to do after you’ve read the section on Cartesian coordinates?
2. Can you find the section that contains the equation for a plane through a given point and perpendicular to a given vector?
3. Can you find a diagram showing the projection of a vector onto another vector?
4. What is the meaning of the scalar product of two vectors?
5. What is the associative law for the addition of vectors?
6. Can you find an example showing how to solve a geometric problem?

After looking at the Vectors site
1. What did you like best?
2. What did you like least?
3. Did you find that you needed help in order to find your way around the material?
4. What would you have liked to know about but couldn’t find?
5. What things on the site do you think are unnecessary?
6. Could you find out easily whether a section was going to be helpful?
7. How easy was it for you to locate the material you were looking for?
8. Was it clear what you needed to know before being able to work through any particular section?
9. Is it easy to find the definitions of the fundamental concepts?
