Engineering and Physics

- Application of student-centred strategies in teaching with computer aided instruction 1
Li Tao, Harbin Institute of Technology
Introducing student-centred teaching strategies to improve teaching and learning in *Theory of Machines and Mechanics* 5
Charles Cheng, Huazhong University of Science and Technology
Use of the Workshop Tutorial in teaching *General Physics* 10
Ping Zhang, Beijing Normal University and Manjula Sharma, University of Sydney

Chemistry

- The reform of teaching in *General Chemistry*: Establishing student-centred teaching strategies 15
Jianing Xu, Jilin University
Applying student-centred teaching strategies to enhance the teaching quality of an *Inorganic Chemistry* course 20
Liu Yunqi, University of Petroleum, China
Thinking towards teaching *Physical Chemistry* in China: How to increase the learning interest in this course 25
Zhou Xia, Lanzhou University
Using problem-based learning in teaching *Analytical Chemistry* 28
Wang Yuzhi, Hunan University
Using appropriate strategies to improve teaching and learning in organic chemistry and organic chemical experiment courses 34
Yingjie Lin and Zaiqun Lin, Jilin University
Contemporary teaching strategies in general chemistry 39
Baodi Gou, Peking University
Using problem-based teaching and problem-based learning to improve the teaching of electrochemistry 42
Yu Ying, University of Petroleum, China

Biology, Medical and Pharmaceutical Science

- Teaching cell biology in a medical course in China: Applying appropriate methods 48
Chen Ping, Xi'an Jiaotong University
Integration of modern and traditional teaching strategies in plant physiology 53
Weng Xiaoyan, Zhejiang University
Improving teaching and learning in a plant biology course further and deeper 58
Li Lianfang, China Agricultural University and Charlotte Taylor, University of Sydney
The application of contemporary teaching strategies in plant biology 65
Jialing Yao, Huazhong Agricultural University
Supporting student learning: Curriculum redesign of *General Pharmacy* in Xi'an Jiaotong University 70
Weijing Pei, Xi'an Jiaotong University
Implementation of teaching strategies in a medical physiology curriculum: A shift to student-centred learning 74
Yang Zhijie, Xi'an Jiaotong University

Earth, Environmental and Space Sciences

- The use of a constructivist teaching model in environmental science at Beijing Normal University 78
Ye Zhao, Beijing Normal University
Using contemporary education strategies to improve teaching and learning in petrology courses at Peking University 84
Chunjing Wei, Peking University
The use of student-centred learning strategies in the course of *Data Structures and Algorithms* 90
Liu Chuxiong, Peking University

Mathematics

Some reflections on mathematics, mathematics education and mathematicians	95
<i>Pan Shengliang, East China Normal University</i>	
Using student-centred teaching strategies in calculus	100
<i>Biao Zhang, Harbin Institute of Technology</i>	
Seed-germination teaching and learning theory net-distribution tissue methods	104
<i>Guoqing Liu, Harbin Institute of Technology</i>	
Using pictures to teach in linear algebra	108
<i>Liu Shenquan, South China University of Technology</i>	
Cultivating the interest of students in higher mathematics courses	112
<i>He Jingsong, University of Science and Technology of China</i>
