Symposium Proceedings

Visualisation and Concept Development

October 2 & 3, 2008
The University of Sydney
UniServe Science

UniServe Science aims to enhance the quality of university science education in Australia by collecting, maintaining and disseminating information on up-to-date and innovative teaching. To this end UniServe Science provides support at both an international and national level. Internationally, UniServe Science has published *CAL-laborate*, an international journal, prepared in collaboration with the Higher Education Academy in the United Kingdom since 1997. *CAL-laborate* is available online at http://science.uniserve.edu.au/pubs/callab/. This year, we launch *CAL-laborate International*, a refereed journal under the editorship of Professor Roger Lewis, from University of Wollongong. Nationally, UniServe Science conducts an annual conference which focuses on the enhancement of tertiary science teaching and learning.

The annual conference now consists of three components: a Science Discipline Day, held for interested parties to come together and discuss issues of common interest; the First Year Experience Discussion Forum; and the Tertiary Science Teaching Symposium. The First Year Experience Forum concentrates on issues to do with laboratory teaching and whether we can sustain this mode in a climate of reduced resources. Notes from the FYE forums are available online from http://science.uniserve.edu.au/disc/fye.html.

The Pearson Education UniServe Science Teaching Award, which is presented at the annual Symposium, recognises teaching that improves student learning outcomes via the innovative and integrated use of information technology.

Papers for the 2008 Symposium, ‘UniServe Science Symposium on Visualisation and Concept Development’ have been reviewed to meet the Department of Education, Science and Training standard for research conference publications. The full papers were peer reviewed by at least two members of a national review panel that was chaired by Alexandra Hugman, Director, UniServe Science.

The proceedings are distributed nationally and internationally from the Web (http://science.uniserve.edu.au/pubs/procs/).

---

**UniServe Science PERSONNEL**

**Director:** Alexandra Hugman

**Associates:** Associate Professor Ian Johnston, Associate Professor Mary Peat

**Educational Technologist:**
Kaye Placing

# Table of Contents

**Peer Reviewed**

## Keynote Speakers

* A perspective on threshold concepts in Science and Engineering  
  Prof John G. Hedberg, School of Education, Macquarie University, Sydney, Australia  
  1

The Challenge of Visualising Science: Some Research Findings  
  Assoc Prof Roy Tasker, School of Natural Sciences, University of Western Sydney  
  12

Agent-augmented Multi-user Virtual Environments and Computational Agent-based Models: Beyond Heat from a Burning Fire?  
  Prof Michael Jacobson, Faculty of Education and Social Work, The University of Sydney  
  12

### Pearson Education Science Teaching Award Invited Presentation

* Listing of Inherited Disorders in Animals (LIDA) for cats: an on-line relational database, using non-technical descriptions written by veterinary students  
  Paul McGreevy, Sally Pope, Federico Costa, Peter Thomson, Tonya Stokes and Vanessa Barrs, Faculty of Veterinary Science, The University of Sydney  
  13

### Symposium Presentations

* The use of formative assessment and support materials to assist students in taking control of their own online learning  
  Richard F. Brightwell and David Buchannan, School of Nursing, Midwifery and Postgraduate Medicine, Edith Cowan University, Perth, Australia  
  18

* Engaging students and improving learning outcomes with inquiry based biology practical classes  
  Karen Burke da Silva, Zonetteje Auburn, Narelle Hunter and Jeanne Young, School of Biological Sciences, Flinders University, South Australia, Australia  
  24

Empowering physics demonstrators to enhance first year laboratory experiences by use of real time visualization – a working DVD  
  Suzanne Hogg and Lakshmi Srinivasan, Physics and Advanced Materials, University of Technology, Sydney, Australia  
  30

* Do students’ experiences of a service subject correspond to their expectations?  
  Les Kirkup, Alberto Mendez and Dale Scott, Department of Physics and Advanced Materials, University of Technology, Sydney, Manjula Sharma, John O’Byrne, Department of Physics, The University of Sydney, Jamie Quinton, School of Chemistry, Physics and Earth Sciences, Flinders University, South Australia, Australia  
  35

Adding value to Physics Education Technology simulations  
  Robert J. Kruhlak and Frederique Vanholsbeeck, Department of Physics, and Colin Coghill, Department of Electrical and Computer Engineering, University of Auckland, Auckland, New Zealand  
  41

* Aligning Introductory Chemistry with the needs of the Faculty of Veterinary Science  
  Thien Le, Siegbert Schmid, Adrian V. George and Justin R. Read, School of Chemistry, The University of Sydney, Australia  
  47

* A pilot study on the impact of an online writing tool used by first year science students  
  Osu Lilje, Virginia Breen, Alison Lewis and Aida Yalcin, School of Biological Sciences, The University of Sydney, Australia  
  54

* Initial development of a Physics Goal Orientation survey using factor analysis  
  Christine Lindstrom and Manjula D. Sharma, School of Physics, The University of Sydney, Australia  
  60

* Teaching Special Relativity using Virtual Reality  
  Dominic McGrath, Teaching and Educational Development Institute, The University of Queensland, Craig Savage and Michael Williamson, Department of Physics, The Australian National University, Margaret Wegener and Tim McIntyre, School of Physics, The University of Queensland, Australia  
  67

* Are science students’ missing classes for the reasons we think?  
  R. Ian Menz, Karen Burke da Silva and Narelle Hunter, School of Biological Sciences, Flinders University, South Australia, Australia  
  74

* Prelaboratory activities to enhance the laboratory learning experience  
  Glennys O’Brien and Melanie Cameron School of Chemistry, University of Wollongong, Australia  
  80
eBot: a collaborative learning object repository for Australian flora .......................... 86
Rosanne Quinnell, School of Biological Sciences, The University of Sydney; The University of New South Wales
Murray Henwood, School of Biological Sciences, Su Hanfling and Rowan Brownlee, The Library, The University of Sydney, Australia

Streamed project work: Letting everyone rise to the challenge ........................................ 91
Debbie Richards and Peter Busch, Department of Computing, Macquarie University, Australia

Activating multiple senses in learning Statistics ................................................................. 98
Alice Richardson, Faculty of Information Sciences and Engineering, Felicia Zhang, Faculty of Communication and International Studies, and Brett A. Lidbury, Faculty of Science, University of Canberra, Australia

Future Directions in Representing Learning in Biology ....................................................... 104
Pauline Ross, College of Health and Science, University of Western Sydney, Australia

Build your own virtual photonics communication system: a photonics simulator for high school students ....... 109
Adam Strickland, Department of Computing, Robert Williams, Nemanja Jovanovic, Benjamin Johnston and Judith M. Dawes, Department of Physics, Macquarie University, Australia

Developing a discipline-based measure of visualisation ..................................................... 115
Ken Sutton, Faculty of Science and Information Technology, and Anthony Williams, Faculty of Engineering and Built Environment, The University of Newcastle, Australia

Students’ conceptual knowledge of mechanical waves across different backgrounds and cultures .......... 121
Apisit Tongchai, Institute for Innovation and Development of Learning Process, Mahidol University, Thailand
Manjula Sharma and Ian Johnston, School of Physics, The University of Sydney, Australia, Kwan Arayathanitkul, Department of Physics, Mahidol University, Thailand

Using a constructive feedback approach to effectively reduce student plagiarism among first-year psychology students ......................................................................................................................... 127
Fiona White, Caleb Owens and Melanie Nguyen, School of Psychology, The University of Sydney, Australia

ACELL for Physics? .............................................................................................................. 133
Kate Wilson, Department of Physics, Australian National University, David Mills, School of Physics, Monash University, Manjula Sharma, School of Physics, The University of Sydney, Les Kirkup, Alberto Mendez and Dale Scott, Department of Physics, University of Technology, Sydney, Australia

Threshold concepts and troublesome knowledge in a second-level mathematics course .............................................................. 139
Susan Worsley and Michael Bulmer, Mathematics, Mia O’Brien, Teaching and Educational Development Institute, The University of Queensland, Australia

The personalisation hypothesis in e-learning: Further developments .................................. 145
Alexandra Yeung, Siegbert Schmid and Adrian George, School of Chemistry, Michael King, Faculty of Education and Social Work, The University of Sydney, Australia

Can one version of online learning materials benefit all students? ..................................... 152
Alexandra Yeung and Siegbert Schmid, School of Chemistry, The University of Sydney, Roy Tasker, School of Natural Sciences, University of Western Sydney, Australia

Language difficulties in first year Science - an interim report ......................................... 159
Felicia Zhang and Brett Lidbury, University of Canberra, Adam Bridgeman, The University of Sydney, Brian Yates, University of Tasmania, and John Rodger, University of Newcastle, Australia

Critical reading and writing in first-year psychology: mass screening and targeted assistance .............................................................. 165
Jacquelyn Cranney, School of Psychology, Gwyn Jones and Sue Starfield Learning Centre, Sue Morris, Learning and Teaching, Kristy Martire, National Drug and Alcohol Research Centre, Ben Newell and Kwan Wong School of Psychology The University of New South Wales, Australia

Seeing is understanding: the use of online prelaboratory exercises to enhance learning in Zoology practicals ........... 165
Susan M. Jones and Ashley Edwards School of Zoology, and Natalie Brown, Centre for the Advancement of Learning and Teaching, University of Tasmania, Australia

Poster Presentations
The use of reflective journals in a first year mathematics unit .............................................. 166
Carmel Coady and Leanne Rylands, School of Computing and Mathematics, University of Western Sydney, Australia
* Microbial vodcasting—supplementing laboratory time with vodcasts of key microbial skills ................................. 171
  A. Crampton and T. Vanniasinkam, School of Biomedical Sciences and A. T. Ragusa, School of Humanities and Social Sciences, Charles Sturt University, Australia

* Evaluating enquiry-oriented experiments in a service subject ................................................................. 177
  Les Kirkup and Lakshmi Srinivasan, Department of Physics and Advanced Materials, University of Technology, Sydney, Australia

* Using assessment audits to understand students’ learning obstacles ....................................................... 182
  Rebecca LeBard, School Biotechnology and Biomolecular Sciences, The University of New South Wales, Rosanne Quinnell, School of Biological Sciences, The University of Sydney/The University of New South Wales

* The structure, use and impact of the staff version of ORWET ............................................................. 188
  Osu Lilje, Virginia Breen, Alison Lewis and Aida Yalcin, School of Biological Sciences, The University of Sydney, Australia

* Digital video as a resource for teaching physics – A preliminary evaluation of effectiveness and some tips on how to do it better .................................................................................................................. 193
  Adam P. Micolich, School of Physics, The University of New South Wales, Australia

* Why do physics? Where does it really lead? .............................................................................................. 199
  John O’Byrne, School of Physics, The University of Sydney, Australia Alberto Mendez, Department of Physics and Advanced Materials, University of Technology, Sydney, Australia

* How does a high school outreach program engage our future scientists? ................................................. 202
  Chong Eng Tay, Michelle Kofod, Rosanne Quinnell, Bianca Lino and Noel Whitaker, Faculty of Science – EdSquad, The University of New South Wales, Australia

* Writing critically about science: a curriculum structure for animal scientists ........................................ 207
  Rosanne M. Taylor and Melanie Collier, Faculty of Veterinary Science, The University of Sydney, Australia

* Leveraging the online environment to remove barriers to student learning in large first year foundation subjects .... 214
  Emma Yench and A. Crosky, School of Materials Science and Engineering, K. Wilk, School of Physics, B. Allen, Learning and Teaching @UNSW, The University of New South Wales, Australia

iResearch: information skills for life .............................................................................................................. 220
  Su Hanfling, Humanities, Arts, Sciences, Technology Library, Southnary Tan Rebecca Goldsworthy, Fisher Library, The University of Sydney, Australia

Glimpses of Science revisited: ‘Multimedia-assisted’ science activities for primary school teachers and their students 220
  George Hatsidimitris, Jacinda Ginges and Joe Wolfe, School of Physics, The University of New South Wales, Rick Connor, E-learning, The University of Sydney, Australia

The Psychology of university student learning and performance: using the wiki tool in Blackboard to support collaborative hypertext development among first-year psychology students ................................................................. 221
  Steve Provost and Donnah Anderson, Department of Psychology, Southern Cross University, Australia

Using Threshold Concepts to generate a new understanding of teaching and learning Biology ............................... 221
  Charlotte Taylor, The University of Sydney, Noel Whitaker, Chris Hughes, Michelle Kofod, Louise Latze-Mann, The University of New South Wales, Pauline M Ross, University of Western Sydney, Australia

Notes ............................................................................................................................................................................. 222
