The function of a splitter is to _____

Challenge 3: What does a buffer do? _____

Activity: Secret Party

You are turning 17 and want to throw a secret house party without Louise knowing. Your task is to create a network to send the invitations to Tim, Mick and Sue while sending a friendly message (without mentioning the party) to the other people. Tim had recently broken up Louise and therefore you don't want any complications at the party. Mick is your best friend so you want him to come earlier to help you prepare. You want the message to get to him first

Good Luck and Have Fun at your Party!!!!
